

Math Contest

April 1st, 2014

April 1st, 2014

The math contest is held each spring at Snow College. Schools from all over the region send students who compete by taking of all things, a math test. They come work hard and show off their skills. The winners of the contest receive great prizes. While at the contest, participants are invited to learn more about different science programs and careers by attending lunch time presentations by many departments. It is a great day and one that students remember for a long time.
