AUTO 1008

Division: Career and Technical Education
Department: Transportation Technology
Course: AUTO 1008
Title: Principles of Technology II
Catalog Description:

This applied physics course covers mathematic computations necessary to perform experiments involving scientific concepts of vibrations, energy, conversion, transducers, radiation, light, and time constants as applied to mechanical, fluid, and electrical systems found in modern industry. Laboratory activities featuring measurement and instrumentation are emphasized.

General Education Requirements: N/A
Semesters Offered: TBA
Credit/Time Requirement: Credit: 2; Lecture: 1; Lab: 2
Clock/Hour Requirements: 45
Offered for Non-Credit: Yes
Prerequisites: AUTO 1007

Corequisites: N/A

Justification:

Principles of Technology II helps students acquire skills for understanding and solving problems they will encounter in continued study of automotive technology, as well as problems that they will encounter on the job. This course is approved by the program advisory committee.

Student Learning Outcomes:

Upon completion of this course, students will be able to understand and explain the following concepts:

- waves and vibrations
- mechanical, fluid, electrical, and thermal energy conversion
- mechanical, fluid, electrical, and thermal transducers
- radiation
- light and optical systems
- time constants
- using technical math concepts and computations for solving practical application problems.

Content:

Course objectives will be accomplished by providing students with learning experiences in the following subject areas:

- waves and vibrations
- energy
- conversion
- transducers
- radiation
- light and optical systems
- technical mathematics.

General Education Outcomes:

Applied Education Outcomes:

1) Students will acquire entry-level skills specific to and appropriate for employment in their chosen field of study.

Math skills will be acquired by hands-on application of basic concepts through demonstration and experimentation. Instructor will observe students as they practice these skills and provide oral feedback.

Key Performance Indicators:

Student Learning Outcomes will be assessed by two or more of the following Key Performance Indicators:

- chapter tests
- pass a final test.
- lab activities
- assignments
- performance in subsequent courses.

Representative Text and/or Supplies:

- *Principles of Technology*, current edition, Center for Occupational Research and Development (CORD).
- *Principles of Technology Student Resource Book*, current edition, Center for Occupational Research and Development (CORD).

Optimum Class Size: 10
Maximum Class Size: 18

Signatures:

I hereby submit this course syllabus:

_____

Brent Reese, BS, Associate Professor

I hereby find this course consistent with the goals and resources of the Transportation Technology Department:

_____

Brent Reese, BS, Associate Professor, Chair

I hereby find this course consistent with the goals and resources of the Career and Technical Education Division:

_____

Michael P. Medley, MBA, Assistant Professor, Dean

I have discussed the need for library resources related to this class with the person submitting the syllabus:

_____

Lynn Anderson, MLIS, Technical Services Librarian (Main Campus)

_____

Michelle Olsen, MLS, Campus Librarian (Richfield Campus)
